STATEMENT OF RELEVANCY**Reference AO (JP 3-50960) on Form PTO 1449:**

This reference discloses a multi-valuing process that uses an error diffusion method. The technique of this reference utilizes a matrix of threshold values shown in Fig. 5 and Fig. 6 to perform the multi-valuing process that uses the so-called error diffusion method. In other words, the threshold values that are used for the multi-valuing differ from pixel to pixel. In the method of this reference, however, the threshold values are not chosen according to tone values of image data. Also, discloses the tone expression method that uses the error diffusion method.

Reference AP (WO 98/03341) on Form PTO 1449:

Fig. 17 discloses a technique of changing threshold values according to tone values (data DC), where the threshold values are utilized in a binarization process that uses an error diffusion method.
